# Five good reasons...

## 1. No more rust problems

Made from anti corrosion Colorbond zincalume steel base. Continuous Colorbond guttering will not rust for a minimum of 25 years, so you will not need to replace gutters again.

## 2. Low Maintenance

Continuous Colorbond Guttering is prepared with an oven baked exterior grade top coat for low maintenance, so you can give away your paint brushes. There are more than twenty colors to choose from.

Colorbond fascia cover will enhance the look of your home and has been designed with a low maintenance finish.

For the ultimate in low maintenance, go for our great value leaf tray which will reduce the need for you having to clean out your gutters.

## 3. Rolled on site

The guttering is custom made on site using our mobile factory. It is made to measure in continuous lengths. With fewer joints there is less chance of a leak occurring.

## 4. One day installation

Most jobs can be completed in a day. We will take special care with your garden and all rubbish will be removed on the day your new guttering is installed.

## 5. Satisfaction guaranteed

# Satisfaction guaranteed... for your peace of mind

*Peace of mind can only come from knowing you have chosen the right people to replace your gutters. But how do you know you have made the right choice?*

*Well most people rely on recommendations from friends, neighbours or relatives. That's fine but what if they don't know a good tradesmen to refer you to?*

### ■ Solution...

**We suggest you choose a company that is happy to...**

- Show you up-to-date testimonials from happy customers in your area.
- Give you 2-3 jobs in your area that you can drive past and have a look at.
- Give you the appropriate guarantees that transfer the risk of unsatisfactory workmanship back on to the tradesmen.
- Prove how their product and service represent the best value. Remember the cheapest price may turn out to be the most expensive — especially if you have to get someone else back to redo or fix up substandard work.

At **Continuous Guttering** we are happy to do all the above and more in order to give customers the peace of mind they deserve. A large portion of our new work comes from customers referring us to their relatives, friends and neighbours.

### ■ Risk Free Money Back Guarantee

We give a total of six guarantees ranging from product to workmanship. However, the one that offers the greatest peace of mind is our **Satisfaction Guarantee** or your money back. We have designed this so that all the risk is on us.

Our Risk Free Money-back Guarantee works like this — if you are not happy with the standard of workmanship then please call us and let us know. We will be back within seven working days to rectify any problem areas. If at this point you are still not happy, we encourage you to call the Plumbing Industry Commission to organise an audit of the work — we pay for this. If defects are noted by an inspector from the Commission then we have seven working days to fix them. If we cannot do this we will give you a full refund. This applies to the installation of Continuous Colorbond Guttering only.

### ■ Other Guarantees...

1. Supply a 10 year Compliance Certificate which guarantees you we only use highly skilled, well trained, licensed plumbers.
2. Member of HIA and Plumbing Industry Commission.
3. 15 year BHP paint finish warranty.
4. 15 year workmanship warranty from Continuous Guttering Co Pty Ltd.
5. 25 year base metal warranty.

Below are a couple of jobs in your area that we have done for customers just like yourself who were also searching for a reliable, value for money, quality gutter replacement service and they turned to **Continuous Guttering** for assistance.

## Testimonials

### Here are samples of what a few of our satisfied customers have had to say about us...

- Mark Kotsikas of Boronia – “The quality of your workmanship and the professionalism of your tradesmen has made the installation an outstanding success. I am sure your company will receive follow up business from this installation.”
- Ms R Robyn of Cheltenham – “I am delighted with the standard of work produced by your company and the professionalism displayed by both your estimator and tradesperson. They provided all the information I required and answered my questions clearly and courteously.”
- Mrs C Morcom of Gladestone Park – “We cannot speak highly enough of the two people we have dealt with at Continuous Guttering.... Congratulations on a job well done. You have made a great improvement to our home without having to paint ever again.”
- Mr C Johnston of Mt Waverley – “I am impressed with the sheer look provided. My thanks to your installer who ensured that our garden was not damaged during installation.”
- Mr A Ros of Burwood East – “We must commend you on your work – it was carried out very professionally and the end result was excellent — even our neighbors have commented on the ‘new look’. We would strongly recommend your services to our friends.”
- Mrs A Sturgeon of Cheltenham – “Our house has had a face lift thanks to Continuous Guttering!”

## Compare the difference

### Continuous Guttering – A Quality installation

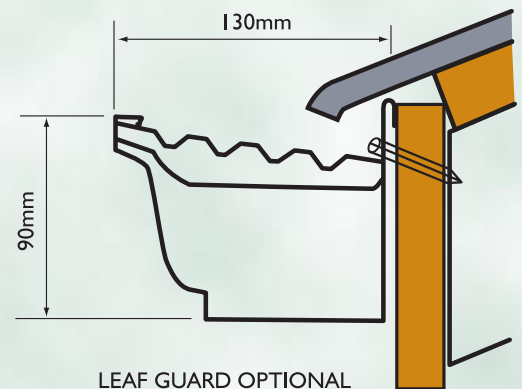

The Ogee Continuous Colorbond guttering, unique to us, represents great value. Made from the thickest gauge BHP guttering material offering strength and durability. We custom make the gutter at your home in continuous lengths, with no joins between corners there is less chance of a leak occurring. It has a greater water carrying capacity than the Old Style Quad gutter.

### Others – Old Style Quad in project grade

This gutter comes in 6 metre lengths. Joined by sealant and a couple of rivets this offers a short term fix. The greater the number of joins the greater the potential for leaks to appear in your new gutter. Plumbers often use the thinnest gauge available to cut costs, commonly referred to as project material.

If you choose Old Style Quad always insist that there are no joins in gutter sections less than 6m long. This will ensure that you don't get waste offcuts from your plumber's last job.

- Colorbond is a Registered Trademark of BHP Steel
